

T.C.T. Core Drill With Universal Shank

Specifications :

- Carbide tipped cutting edge welded to the tough alloy steel body
- Special Multi-Cut design (3-ply) help to remove chips and reduce cutting resistance.
- High cutting speed, High wear resistance and considerably longer tool life
- Ideal for high alloy and stainless steels, non-ferrous and light metals and reinforced fabrics.
- Applications : Drill flat materials, tubes, vaulted, surfaces, overlapped holes possible.
- Work with portable electric or pneumatic tools, vertical drill machines etc.

- **Effective length : 28 mm**
- **Equipped with 06mm HSS Pilot Drill and Ejector Spring for piloting and removing the cutter piece**

- **Size : As Below Table**
- **14-65 mm (9/16"-2 9/16") hole cutter and shank in one piece**
- **67-152 mm (2 5/8"-6") hole cutter and shank in separated**
